- **BP:** 619px
- **H:** 133°
- **K:** 4

Task 1 – Category Filter

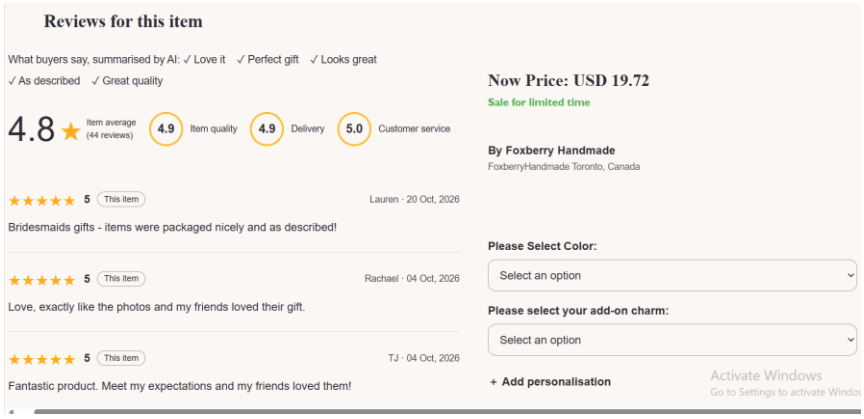

- Added four product categories using radio buttons.
- Implemented category filtering using CSS selectors without JavaScript.
- Applied the assigned accent color to the selected category.

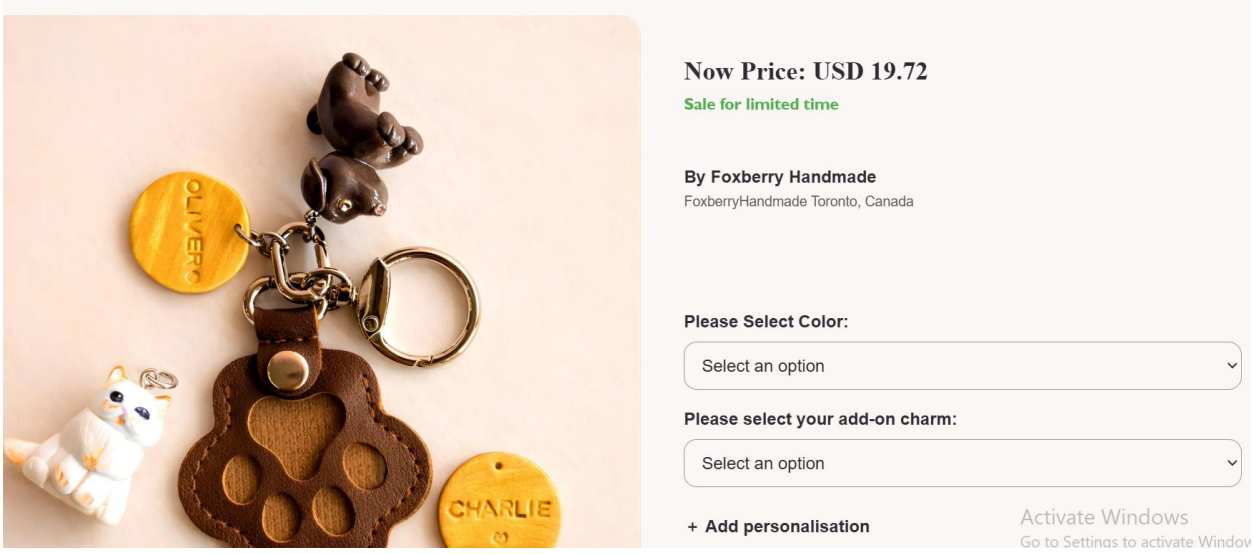

Task 2 – Product Layout

- Reworked the product detail page using CSS Grid and named grid-template-areas.
- Implemented a responsive layout for mobile and desktop screens.
- Added sticky positioning to the product details box with a top offset of 89px.

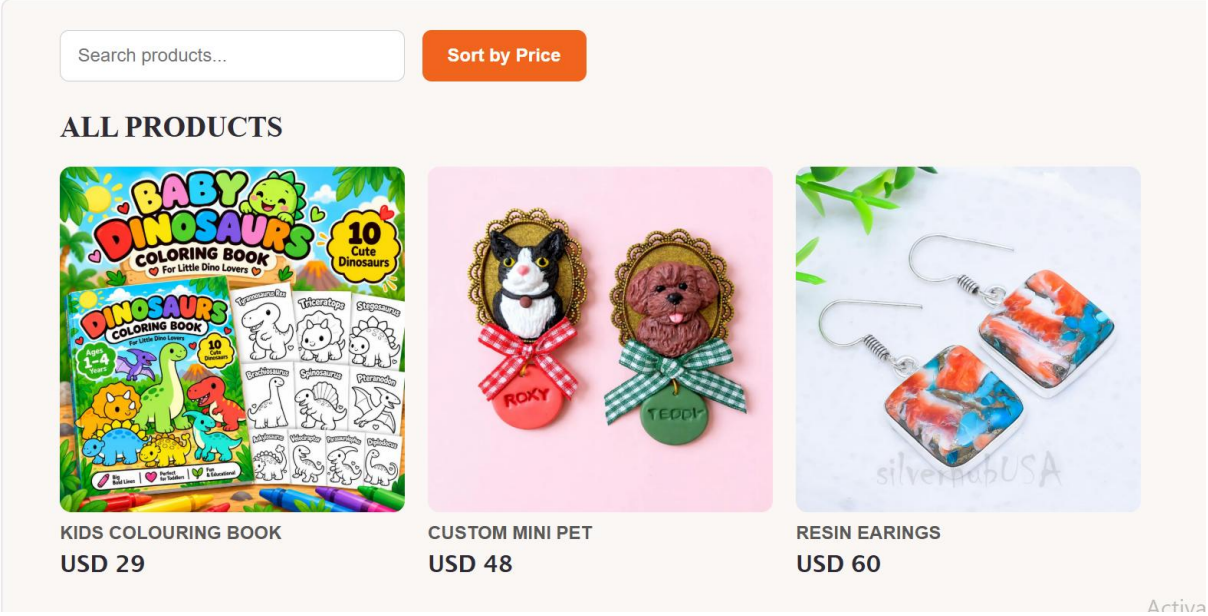

Task 3 – Live Search and Price Sort

- Added live product search with case-insensitive matching.

- Combined search functionality with the existing category filter and added the "No products found" message.
- Implemented ascending and descending price sorting using existing product cards and appendChild(). Added the Premium label condition for prices above 1900.

Files Changed

- index.html – Task 1 category filter and Task 3 search/sort controls and JavaScript linking.
- product.html – Task 2 product page structure.
- style.css – Task 1, Task 2 and Task 3 styling.
- script.js – Task 3 live search, filtering, sorting and Premium label.
